

To whom it may concern,

I am writing to recommend Jeonjun “Jun” Song for your program.

Jun is a stand-out student. I have had the pleasure of having them in my Principles of Programming course and as a mentee for an Fulton Undergraduate Research project. In all of these, Jun has developed and led complex projects with skill, organization, and highly effective teamwork. Jun is highly skilled, motivated, and a strong independent contributor.

In the research project, Jun engaged a very challenging problem to develop a computer vision based Yard Management System in cooperation with an industry partner. Jun role on the project was to develop the methods and algorithms for recognizing identifiers on truck containers and integrating with the industry partners’ systems. Jun showed great maturity and integrity in dealing with a difficult and demanding client, as well as a very complex technical challenge and this has led to the continued success of the project. In their role on the team, Jun demonstrated excellent skills, and a thirst for knowledge. Their work product is very good, and they are highly regarded by their teammates.

In class, Jun takes their studies very seriously, has perfect attendance, and can be relied on for participation.

Based on these experiences, I highly recommend Jeonjun Song for your program.  
Sincerely,

-Ryan Meuth
